Youssef Werrad

Olhão, Portugal
youssefwerrad@gmail.com
https://youssefwerrad.github.io

summary

Self-taught, with a foundation built through Harvard's CS50 program series. Backend: Python, Django, Flask, REST API design, and relational data modeling. Frontend: JavaScript, React, and responsive UI development. Four deployed portfolio projects spanning healthcare, e-commerce, and review-platform domains, with hands-on experience in authentication, role-based access, and third-party API integration.

technical skills

Languages: Python, JavaScript, HTML5, CSS3, SQL, C. **Front-End:** React, Bootstrap, Responsive Design.
Back-End: Django, Flask, REST APIs.
Data and DevOps: PostgreSQL, SQLite, Docker, Git, GitHub, CI/CD Basics. **AI and Cloud:** Python for AI, Machine Learning basics, Neural Networks, Amazon Web Services.
Practices: Agile/Scrum, Test-Driven Development, Code Review.

projects

Best Cars — Car Dealership Reviews **2026**
Django, React, Vite, PostgreSQL, Docker Compose, Flask.
Full-stack dealership review app with dealer listings, ratings, and customer reviews, based on IBM's capstone. Built a moderation workflow (staff-approved reviews, verified-purchase labels, reports, dealer responses) and photo uploads. Architected a 3-service Docker Compose stack (Django, Flask sentiment microservice, PostgreSQL) where reviews still save if the sentiment service is down. 18 automated tests.

Paradise Nursery **2025**
React, Redux Toolkit, Vite, JavaScript. Deployed on GitHub Pages.
Plant shop (IBM course project) with 30+ plants in 5 categories, a Redux Toolkit cart with quantity updates and running totals, and an admin panel for adding and removing products. Completed a full visual redesign across 9+ files and fixed a cart grid layout bug.

Book Reviews **2025**
Django, Python, SQLite, Bootstrap, JavaScript.
Book discovery and reviews built on the Open Library Search and Subjects APIs, with no local catalogue to maintain. Full-CRUD star reviews with session auth, per-user ownership, and one review per user per book enforced at the database level. Custom library-themed design with shimmer skeleton loaders. 26 automated tests; deployed on Render.

CarePoint Clinic Management System **2026**
Flask, Python, SQLite, JavaScript.
Role-based clinic platform supporting 3 user roles (patient, doctor, admin) with availability-aware booking validated server-side against doctors' working hours. Relational SQLite schema with enforced foreign keys, ownership checks on every route, role-scoped dashboards, visit notes, and prescriptions. Deployed on Render.

certifications

CS50's Introduction to Computer Science — Harvard University (edX)	2025
CS50's Introduction to Programming with Python (CS50P) — Harvard University	2025
CS50's Web Programming with Python and JavaScript (CS50W) — Harvard University	2025
CS50's Introduction to Artificial Intelligence with Python — Harvard University	2026
CS50's Introduction to Cybersecurity — Harvard University	2026
CS50's Computer Science for Business Professionals — Harvard University	2025
Introduction to Cybersecurity — Cisco Networking Academy	2025
Developing Front-End Apps with React — IBM (edX)	2026

training and coursework

Audit / self-study, not formal certifications.
IBM / edX: Full Stack Application Development Capstone Project
Back-End Application Development with Node.js and Express
Introduction to Web Development with HTML5, CSS3, and JavaScript
DevOps and Software Engineering Capstone Project
Agile and Scrum Fundamentals
Python for AI and Development Project
Introduction to Cloud Computing
Google / edX: Cloud Computing Foundations: Cloud Computing Fundamentals

education

University of Algarve (UAlg) **2018 – 2019**
Systems Engineering and Computer Technologies.

languages

Arabic (native); Portuguese (C1/C2); French (C1/C2); English (B1/B2).
